NEWSLETTER - VOL. 4

LANDSCAPING ELEMENTS

Welcome to the newest edition of our Printera newsletter! In this issue, we're turning focus to the diverse applications of concrete 3D printing in landscaping. From striking signage to custom outdoor features, we'll explore how this technology is shaping landscapes in creative and functional ways.

This edition begins with a closer look at the CIMS America's sign. Measuring over 50 feet in length, this sign was printed in our Florida warehouse and then transported to Texas for installation. We printed the shell of each letter, which was later reinforced, filled and installed on site by the contractor. This project helps demonstrate the efficiency and customization possibilities of using concrete 3d printed formwork, delivering components that are ready to be integrated into any large-scale landscape construction project.

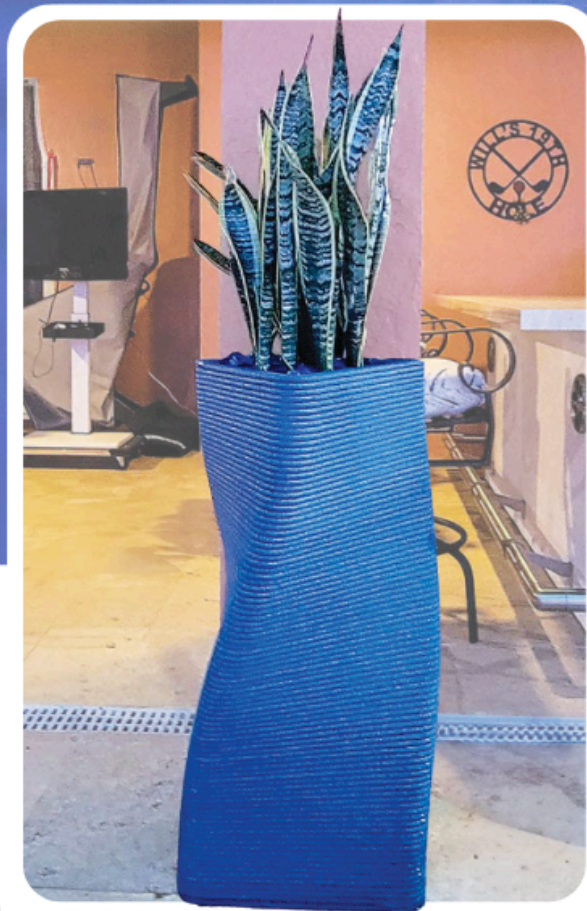

BLUE SPRINGS

The Blue springs project was a customized landscape initiative where we crafted a set of dark blue planters to complement this poolside retreat located in Davie, FL. The planters were designed to the client's exact specifications through a collaborative design session, ensuring the final product reflected their vision.

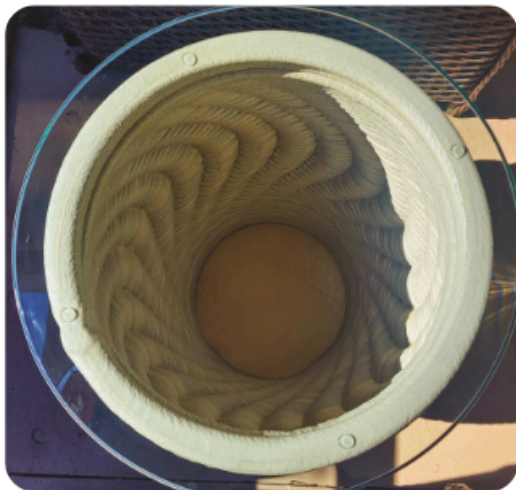

EXPAND YOUR OUTDOOR SPACE

In addition to custom planters, consider adding unique features like a fire bowl and podium. This can serve as both a functional and decorative element in your outdoor space.

MEADOW LAKES

At Meadow Lakes in Odesa FL, we embarked on a landscape project that involved creating custom concrete planters and side tables to elevate the client's outdoor space. Each piece was designed to add both functionality and aesthetic appeal to their home.

LOGO INTEGRATION

One of the standout features of this project was the integration of a custom logo into one of the large planters. The logo was seamlessly incorporated into the print.

FAST ST. HOUSE PART 2

We're excited to revisit the Fast St. House project, which was first featured in Volume 1 of our Newsletter. Since then, we've had the opportunity to add new printed features to this already stunning outdoor space.

The latest additions include an outdoor planter and table set, designed to be both beautiful and durable enough to withstand the strong winds from the Intracoastal. We also had a chance to integrate a poolside bench with planters, offering a seamless blend of style and comfort.

PRINTERA EMPLOYEE *Spotlight*

The greatest part of our company is the people supporting our mission! Each issue we will introduce a member of the Printera family; describing their role, interests and background. On this fourth issue we will introduce Marc Jaross, our Treasure Coast area Sales Rep

MARC JAROSS: TREASURE COAST AREA SALES REP

Marc comes to Printera with a rich history in sales, starting from Wall St. Where he traded commodities and paper for 17 years. Following 17 more years in mortgage sales for Bank of America and Countrywide, he decided to retire to South Florida at 52. Marc fell in love with Printera's technology and products, and came out of retirement at 66 to represent our products on the Treasure coast.

Today Marc is dedicated to interfacing with customers to find creative solutions where 3d printing can be applied. He can frequently be found at various Treasure Coast networking events, or touring prospective customers around the Printera Shop.

When not working with Printera, Marc is still enjoying his retirement by traveling and fishing at every opportunity. He has been to six continents and all 50 states (30 of which he fished in). His bucket list hold only two more items: The northern lights and catching Golden Dorado in South America.

OWN A PART OF INNOVATION!

SHAPE THE FUTURE

Take advantage of this opportunity to invest in a leader in concrete 3D printing.

Printera is at the forefront of the industry, with a proven track record of innovative projects that showcase the versatility and potential of 3D concrete printing in various applications.

This Reg CF offering is made available through StartEngine Primary, LLC. This investment is speculative, illiquid, and involves a high degree of risk, including the possible loss of your entire investment.
